PROFILE

Software developer with about 3 years of professional experience in web design, focusing on business applications and fintech solutions. Experienced in developing merchant onboarding and KYC workflows, payment and bulk-disbursement systems, real-time transaction dashboards, project and inventory management applications and customer-facing web applications. Solid working knowledge of React, Next.js, TypeScript, JavaScript, REST API integration, authentication workflows and modern web application development. Blends practical software engineering skills with business process thinking to transform manual workflows into usable digital systems.

EXPERIENCE

Broadspectrum Digital Payments

November, 2023 – Present

Software Developer

- Built business web applications to handle project management, fintech operations, merchant onboarding, payments, reporting, and internal business processes.
- Developed a Merchant Profiling System which digitizes merchant onboarding and KYC documentation from document submission to administrator review and approval.
- Developed a merchant portal to enable onboarded merchants to view transactions, manage funds, regenerate or revoke API keys and track transaction performance through operational metrics.
- Developed an admin and operations portal to track merchant transaction and transaction metrics in order to generate reports and aid business decision-making.
- Integrated WebSocket to implement real-time transaction updates in merchant and admin portals, allowing merchants, admins and operations analysts to monitor payment activity without the need for manual page refreshes.
- Developed a customer checkout system that allows merchants' customers to make payments via electronic means such as mobile money.
- Developed a bulk payment/disbursement web application that supports manual entry of recipient details or CSV upload of recipient details, scheduled payments, instant disbursement and offers metrics on the performance of the system.
- Redeveloped and maintained websites for subsidiaries within the Broadspectrum Group including bsl.com.gh, sfl.com.gh, isg.com.gh and bdp.com.gh.

Techies 4 Impact

Septemper, 2025 – December, 2025

IT Support Analyst (Volunteer)

- Redesigned and maintained the Techies4Impact website.
- Provided timely technical support to the organization and assisted with day-to-day technology issues.
- Maintained records of IT assets and supported the management of company accounts

Ghana Revenue Authority

October, 2022 – January, 2023

IT Support (Intern)

- Maintained office IT equipment and intranet infrastructure and provided day-to-day technical support.
 - Diagnosed and resolved hardware and software issues affecting office equipment and intranet services, improving system reliability and reducing employee downtime.
-

-
- Collaborated with engineers from Vodafone and MTN during broadband and fibre internet installation to support a smooth handover and minimize technical issues caused by poor communication.

EDUCATION

Kwame Nkrumah University of Science and Technology
BSc. Computer Engineering

2019 – 2023

SKILLS

Frontend: HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Next.js

Backend and APIs: PHP, Laravel, MySQL, REST APIs, Next.js API Routes, API Integration

Development Tools: Git and GitHub, Websockets, AI-assisted software development, Firebase/Firestore

Professional Skills: Problem solving, strategic thinking, technical troubleshooting, creativity, system-oriented thinking

SELECTED PROJECTS

Project and Inventory Management Platform: Web app for tracking project progress, assigning tasks, tracking deliverables, and managing project inventory accountability.

Merchant Onboarding & KYC Platform: Web app for merchant profiling, KYC document submission, review, approval and onboarding for payment services.

Merchant Transaction Portal: Merchant-facing app for transaction monitoring, fund management, API key management, transaction analytics and real time updates.

Bulk Payment and Disbursement Platform: Payment workflow that enables bulk addition of recipients' details manually or via CSV upload, making instant or scheduled disbursements of funds.

Car Rental Customer Intelligence Web App: Web app built for a car rental company to gather customer info and assist in providing services to customers and making business decisions.
