Executive Member, Ghana Engineering Students Association

PROFILE

I am a web developer with about three years' worth of experience in web development. I am skilled in creating responsive and user-friendly websites and web apps. I am front-end development inclined, proficient in HTML, CSS and JavaScript as well as in frameworks like React. I am committed to learning and adapting to new technologies in web development to ensure that the work I deliver is of the highest quality. I am resourceful as well as relentless in the pursuit of set goals.

EXPERIENCE

IT Intern

Ghana Revenue Authority, Kaneshie Medium Taxpayer Office

October, 2022 – January, 2023

Ensured the care and maintenance of office IT equipment and intranet.

Diagnosed and resolved various hardware and software issues affecting office machinery and intranet, improving system reliability and reducing employee downtime by significant margins.

Facilitated collaboration with engineers from Vodafone and MTN during the installation of broadband and fibre internet to ensure smooth hand over and minimization of technical issues arising from poor communication.

Junior Software Developer

Broadspectrum Limited, Dzorwulu

November, 2023 - present

- Developed a project management web app for projects team to effectively track the overall progress of projects as well as monitor projects inventory, thereby reducing ensuring accountability for items used in various projects which ultimately cut down company costs. The web app also allows the team to assign tasks to various project members and track the completion of those tasks, ensuring that tasks are performed in a timely manner.

- Developed the Merchant Profiling System, a web application designed to streamline the Know Your Customer (KYC) documentation process (from submission of documents to approval by system administrators) as well as onboarding process for merchants seeking to use payment services provided by the company.
- Developed portal for merchants successfully onboarded (via the Merchant Profiling System) to view their transactions, manage their funds as well as regenerate and or revoke the API keys they use to access payment services. The app also provides users with metrics concerning their transactions such as total transactions, percentages of successful and failed transactions among others. This web app implements web socket integration to allow merchants to view their transactions in real time.
- Developed a portal for administrators and operations analysts to view transactions being performed by the merchants in real time. This portal also provides real time metrics concerning transactions being performed by all merchants.
- Developed a checkout system for customers of various merchants to make payments to the merchants via electronic means such as mobile money.
- Developed a bulk payment system to allow users to perform mass disbursement of funds. Users of this system can choose to either enter account details of recipients manually or upload the account details via a CSV file. Users can also choose to schedule payments for a later date and or time or disburse funds immediately. The system also provides users metrics about the disbursements they have performed.
- Redeveloped and updated information on websites of subsidiaries within the Broadspectrum Group. (bsl.com.gh, sfl.com.gh, isg.com.gh, bdp.com.gh)

IT Support Analyst (Volunteer)

Techies4Impact

September, 2025-December, 2025

- Responsible for the redesign and maintenance of the Techies4Impact website (techies4impact.com)
- Provision of timely and effective technical support for the organization
- Maintenance of records of IT assets

- Management of accounts and subscriptions of the company

OTHER PROJECTS

- Developed a web app for a car rental company to collect information about their customers to better know what services to provide said customers and to assist in the making of business decisions.
