OBED EFFUM

SOFTWARE DEVELOPER | FULL-STACK WEB APPLICATIONS | FINTECH

+233 57 220 5555 • obedeffum10@gmail.com • obed-effum.vercel.app • linkedin.com/in/obed-effum-b74244194

PROFESSIONAL SUMMARY

Software Developer with approximately three years of professional web development experience, focused on building business applications and fintech solutions. Experienced in developing merchant onboarding and KYC workflows, payment and bulk-disbursement systems, real-time transaction dashboards, project and inventory management applications, and customer-facing web applications. Strong working knowledge of React, Next.js, TypeScript, JavaScript, REST API integration, authentication workflows, and modern web application development. Combines practical software engineering with business-process thinking to turn manual workflows into usable digital systems.

CORE TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS, Tailwind CSS

Backend & APIs: PHP, Laravel, Node, Express, REST APIs, API integration

Application Development: Authentication & authorization, KYC workflows, payment systems, real-time applications, dashboards

Data & Development Tools: Firebase/Firestore, Git, WebSockets, AI-assisted software development

Professional Skills: Problem solving, strategic thinking, technical troubleshooting, creativity, system-oriented thinking

PROFESSIONAL EXPERIENCE

Junior Software Developer | *Broadspectrum Limited, Dzorwulu*

November 2023 – Present

- Develop business web applications supporting project management, fintech operations, merchant onboarding, payments, reporting, and internal business processes.
- Developed a Merchant Profiling System that digitizes merchant onboarding and KYC documentation, from document submission through administrator review and approval.
- Developed a merchant portal for onboarded merchants to view transactions, manage funds, regenerate or revoke API keys, and monitor transaction performance through operational metrics.
- Implemented real-time transaction updates in merchant-facing applications using WebSocket integration, enabling merchants to monitor payment activity without relying on manual page refreshes.
- Developed an administrative and operations portal for monitoring merchant transactions and real-time transaction metrics across merchants.
- Developed a customer checkout system enabling customers of merchants to make electronic payments, including mobile-money payments.
- Developed a bulk payment/disbursement system supporting manual recipient entry, CSV uploads, scheduled payments, immediate disbursements, and payment-performance metrics.
- Developed an internal project management and inventory application that enables teams to track project progress, assign tasks, monitor task completion, and improve accountability for project inventory.
- Redeveloped and maintained information websites for subsidiaries within the Broadspectrum Group, including bsl.com.gh, sfl.com.gh, isg.com.gh, and bdp.com.gh.

IT Support Analyst (Volunteer) | *Techies4Impact*

September 2025 – December 2025

- Redesigned and maintained the Techies4Impact website.
- Provided timely technical support to the organization and assisted with day-to-day technology issues.
- Maintained records of IT assets and supported the management of company accounts and subscriptions.

IT Officer (Intern) | *Ghana Revenue Authority, Kaneshie Medium Taxpayer Office*

October 2022 – January 2023

- Maintained office IT equipment and intranet infrastructure and provided day-to-day technical support.

- Diagnosed and resolved hardware and software issues affecting office equipment and intranet services, improving system reliability and reducing employee downtime.
- Collaborated with engineers from Vodafone and MTN during broadband and fibre internet installation to support a smooth handover and minimize technical issues caused by poor communication.

SELECTED PROJECTS

Project & Inventory Management Platform — Internal web application for project progress tracking, task assignment, deliverable monitoring, and project inventory accountability.

Merchant Onboarding & KYC Platform — Web application supporting merchant profiling, KYC document submission, review, approval, and onboarding for payment services.

Merchant Transaction Portal — Merchant-facing platform for transaction monitoring, fund management, API-key management, transaction analytics, and real-time updates.

Bulk Payment & Disbursement Platform — Payment workflow supporting recipient entry, CSV uploads, immediate or scheduled disbursements, and reporting.

Car Rental Customer Intelligence Web App — Web application developed for a car rental company to collect customer information and support service and business decisions.

EDUCATION

BSc Computer Engineering | 2019 – 2023
Kwame Nkrumah University Of Science and Technology
